Portolio website - Tech Blogpost

I'm a web developer that loves building websites and learning about everything that goes into it.

Studies:

- **Bachelor of Fine Arts in Video-game Development** - Academy of Art University (2015 – 2022)
- **PEP training** – Revature (2024)

Certifications:

- **Verified Certificate for CS50's Introduction to Computer Science** – edX (2023)
- **Certified ISTQB Tester** - ASTQB (2022)

Experience:

Revature (2024 – Present):

- Successfully completed Revature's PEP training, leading to a job offer.
- Currently waiting to be assigned.

Full-time web developer student (2023-2024):

- I have built the front and back end of several web applications, these include:
 - Multi-page portfolio website (Full-stack)
 - Mini-game with global rankings and own database (Full-stack)
 - Account-based website for movie fans with included chat-room and database (Full-stack)

Full-time Localization Tester (2022-2023):

- I had the pleasure of working at one of the video-game industry leading companies, 2K, as one of their primary Localization Testers for Castilian Spanish in Las Vegas.
- During my time at 2K Vegas, I had the opportunity to work across a vast number of platforms and projects, each with their independent workflow.

Level and System Designer (2021):

- I was the sole level designer and one of the system designers/scripters of a collaboration between the NASA and the Academy of Art University. During this collaboration I had the opportunity to learn how to deal with real life clients, do meetings and live presentations and deliver on expectations.

Full-time Academy of Art University Student (2015-2022):

- Successfully finished a Bachelor of Fine Arts in Video-game development where I learned about every aspect that goes into making a video-game application.

Skills:

JavaScript - HTML 5 - CSS 3 - SQLite - Linux - Git – GitHub – Java – Spring Boot
